

# LEOPOLD GREEN SCHOOLYARD PROJECT

---

## *Project Ideas:*

- 1) Prevent schoolyard flooding using green infrastructure*
- 2) Create spaces for outdoor education and healthy, creative play*
- 3) Install community gathering space*

# MORE INFORMATION

## Project Overview

This community led project will connect Leopold students to nature, create more spaces for community events, and address schoolyard flooding issues through a comprehensive planning process.

## What is Green Infrastructure?

A storm-water strategy that mimics natural water systems to manage and use runoff at the source instead of diverting it into our sewer systems.

## How can I get involved?

### Join the Green Team!

- Share ideas at monthly planning meetings
- Help create the green schoolyard conceptual plan
- Spread the word about the project
